PATENT

IN THE UNITED STATES PATENT AND TRADEMARK OFFICE

Applicants: R. Baker, et al.  
Serial No.: 07/827,187 (Case No. T-1092Y)  
Filed: January 28, 1992  
Entitled: IMIDAZOLE, TRIAZOLE AND  
TETRAZOLE DERIVATIVES

Art Unit:  
1203

Examiner:  
C. Chang

93 FEB 16 AM 8:57

The Honorable Commissioner of Patents and Trademarks  
Washington, D.C. 20231

**SUPPLEMENTAL AMENDMENT**  
**UNDER 37 CFR 1.115**

Sir:

In response to the Examiner's Office Action of September 21, 1992, an amendment was submitted on December 21, 1992, addressing the Examiner's rejections.

In review of that amendment, applicants noticed that the structure (IIc) was incorrectly drawn as regarding the 5-membered heteroaromatic ring, as follows:

(IIc)

I hereby certify that this correspondence is being deposited with the United States Postal Service as first class mail in an envelope addressed to: Commissioner of Patents and Trademarks, Washington, D.C. 20231, on the date appearing below.

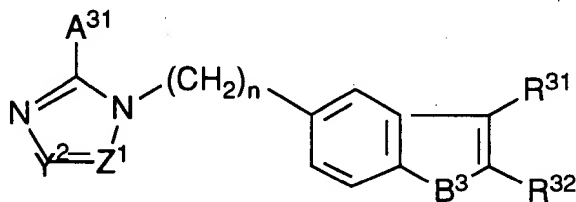

MERCK & CO., INC.

By

Date

2/1/93

The correct structure as supported in applicants' specification on page 15, lines 5-10, is as follows:

(IIC)

As seen, the linking ring nitrogen is now correctly depicted as a tertiary nitrogen, and not a quaternary ammonium compound as inadvertently and incorrectly submitted in the amendment of December 21, 1992.

Examiner is asked to enter this correction into the amendment of December 21, 1992, and to consider all of applicants' arguments.

Respectfully submitted,

By

Robert J. North
